Ar rather fitful intervals the gold mines of Pahang, like the tin mines of the other Malay States, have excited a spasmodic attention in Hongkong and Shanghai, due to the several limited liability companies formed to exploit rather in the light of a joint stock gamble than as earnest and sober efforts to develop the undoubted mineral resources of the Malayan Peninsula and win the wealth that lies hidden there. As a proof of this it is notorious that the shares of the Perak and Selangor Tin Mining Companies and of the Punjom Gold Mining Company were boomed to a premium of more than 200 per cent, before any ore had been extracted from either. It was a gamble pure and simple, and with few exceptions little interest was taken in the properties thoughtlessly invested in by figure as one of the most valuable possession came of course. The first named Companies have disappeared and with them nearly every cent of the money invested. The Punjom Company lives on, but its shares have fallen to a discount of 80 per cent. although its prospects from a mining nation are published in the Classetts. point of view were never so good as at the present moment. This is due partly to the capital being nearly exhausted, partly that collected during the previous year. to the extreme stringency of the money market, and partly to the disappearance of the gambling mania. The Raub Australian Syndicate, since started, has been even more successful in winning gold, but its chares on the 25th January, when the liquidators reare likewise at a discount for similar reasons | port was adopted. and perhaps also from an opinion that the nominal capital is too large. ersiz. If the shareholders in the Peniom Pahang Company, the company formed in Liendon two years ago to take over a portion of the parent Company's vast concession, paid up their calls a new complexion would be put on matters and work would be carried on with energy. Even then, however, the amount of capital would be insufficient to explore and develop the enormous concession possessed by the Punjom and Sunghie Dua Samantan Mining Company. There is room for the formation of half a dozen companies o work this gold field, and it is possible that when the attention of European capitalists has been seriously devoted to Pahang there will be the needed influx of capital.

These remarks have been suggested by the recent utterances of Mr. J. WOODYATT, a. of some British capitalists to inspect Raub and other mining districts in Pahang. Mr. WOODYATT was interviewed by the reporters of the Singapore papers, and gave a highly favourable opinion of the prospects and a great extent, and the chilly winds, with the Rogers in 1871. capabilities of Raub, which he says is not a gold mine but a gold field, which were it located in Australia would have a population of 20,000 miners. It is naturally to the interest of the British countries are almost uninhabited and vast tracts are covered with jungle which doubtles conceals much unsuspected wealth. This been worked there for ages by Chinese and but with marvellous results. The surface has so far only been touched; the real source the interest of British capitalists to turn their attention to this virgin field now that Australia is gradually becoming worked out. The gold mines of South Africa are nodoubt very rich, and are yielding well, and laughter was caused by the interruptions of an e some of the Indian mines are turning out very successful, but it may yet prove that not unhealthy, and though the jungle is thick, and facilities for transport are at present very far from what could West Show paraded the streets on Friday, and be desired, these are obstacles which can numbers of Chinamen and dogs were lassooed by easily be surmounted. Mr. WOODYATT referring to these difficulties said Australian miners would soon get over them, and if the Government do their part in the construction of roads there will only remain the Club team is as follows:more efficient navigation of the rivers to be provided for, which could be accomplished by light draught stern wheel steamers. Indeed, it is all a question of capital judicithem. These companies, however, were in direction. The population will come with the advent of capital. In the meantime something further might be done in the direction of encouraging and promoting Chinese mining, as the Jelebu Mining and Trading Company has done with such satisfactory results for its shareholders. Of course this is out of the question in Hong- any steps to render illegal the importation into kong for the present, but resolute efforts should be made by the residents both of Hongkong and Singapore to bring prominently to the attention of European capit. alists the enormous possibilities of Maleya, a country destined, we believe, some day to

INSTITUTE OF ENGINEERS AND SHIPBUILDERS.

The first annual meeting of the Hougkons Institute of Engineers and Shipbuilders was held on Saturday evening. The proceedings were heartily unanimous and suggested a keen interest in the affairs of the young institution, which during its first year has more than justi-fied its existence. Mr. Robert Cooke, assistant manager of the Hongkong and Whampon Dock Company, occupied the chair and there was a crowded attendance of members.

brilliant career. Forty years ago he wound up progress made has been far more than was s wonderful record at Oxford with a fellowship of All Souls, and a little later became private secretary to Mr. Gladstone. Then the gold fever tempted him away to Australia, and Sir Goorge Bowen, the Governor of Queensland, soon discovered that he was the best man for the Premiership of the colony.—A Premier at thirty-one Sir Rabert transful finally to the The Straits Times says influenza has reached thirty-one. Sir Robert turned finally to the absent members and resignations. J think, gentlomen, that the statement of accounts shows that the Institution so far, seeing that if

is in its infancy, has been very successful and shown great progress, and I think there is great credit due to the Committee and the Secretary and Treasurer for the able way in which they have conducted the business of this Institute for the first year. I will now call upon the Trasurer to read the statement of account. Mr. Boyd-Mr. Chairman and gentlemen. I do not think it will be necessary to go over all the items of this statement of account, simply because later on you will get a printed statement after the additor has signed the balance sheet, There is one item, however, that calls for few words, and that is an amount in the suspense account. That amount is incurred through our late compradore. Of course with reference to the income and expenditure of the Institution the result for the year shows that it is self supporting, which is very satisfactory; but I regret to say that the net result has been affected by defalcations of the late compradore, who has embezzled monies paid to him by the members. The discovery of this matter was made while balancing the books, which at the 23rd January received information that the first showed a deficiency of \$53, and by the as. bullet has been successfully extracted from Mr. sistance of one of the members we were able to fix Duhan's thigh, and that he is progressing some of the amounts on the compradore. There is an explanation why this has not been kept up this year. We have been very busy indeed with other matters, and when we ought to have started this month the complications in the accounts and other little matters such as the forthcoming ball made it impossible to make any arrangements for such intellectual treats. I am afraid they must be left over until next year unless during the coming two months we can get them started. I can only say, gentlemen, in giving up the post of Secretary that I feel very proud indeed of the manner in which you have met me on all matters, and the way in which you have helped and assisted me in every direction make the Institution a success. I am asked by the Committee to suggest that as the accounts have not been ready to be printed and circulated among members owing to the embezzlements of the compradore, we should adjourn this meet, ing until Wednesday week, the 10th February. THE RATE OF INTEREST IN THE FAR EAST.

We believe that within the last two months the traits Government has sold to private investors the whole of the five per cent. Singapore Municipal loan of 1889, amounting to \$400,000. The sale of this loan has been made at par, and the investors who have secured it have almost considéred that to be a favour. The Singapore Municipality is, therefore, out of debt to the Government of the Straits; and the Straits Government has received a very substantial sum of money, which should prevent it from going upon the market for a loan as it contemplated doing. This change in the financial situation is really due to the sotion of the banks in lowering their rates of interest; for it cannot be doubted that in doing so they have reduced the value of lendable money in the Straits and they have increased the value of all sound investments. Thus, in 1890, the not pass the accounts now. GENERAL BOOTH IN INDIA-CALCUTTA, 10th January. General Booth yesterday addressed two crowded native audiences and had a busy day paying | Hotelsand receiving visits. At 11 a.m. the General accompanied by his private secretary drove to Government House for an interview by appointment with Lord Lausdowne. The visitors were received by an aide-de-camp and ushered into the room, where they were soon after joined by the Viceroy. No one else was present during the interview, which lasted for three-quarters of an hour, and his Excellency, it is said, was extremely cordial in his reception of the General His Excellency listened with great attention to his visitor and repeatedly gave assurance that he was deeply interested in any scheme for the improvement of the condition of the masses in India. The subject had engaged the attention of the Government for many years, and one of the means of amelioration which the State had recommended was precisely such a transfer of
